Your Event Photographed...

Based on your needs we provide the following services and more!

Live action coverage of your event

From keynote speakers and group photos to dancing or fireworks we create a photographic history of your event for use in your internal communications and public relations efforts.

Formal portraits of guests and VIP's

We set up a portable studio with professional lighting and backdrops and photograph your guests one at a time and in groups. These can be serious portraits or fun photos.

Entertain guests with photo fun

Through "green screen" and remote controlled photo booth technology, our photography becomes part of the entertainment at your party or social event. Strike a pose!

Branded...

Immediately as the photo is taken your logo and other text can be placed on the image.

Sponsor's Logos can be added to the image as an added benefit to your sponsors.

I.D. Badge Lanyards and photo strips

I.D. Lanyards add another layer of fun and memories to your event. We photograph your guests and create their lanyard in seconds, not minutes. These are great for multi-day events. Event guests love them.

Photostrips from our booth are more fun than those taken in a traditional booth. You can't sweep your loved one off their feet in a small box.

& Remembered!

Give your guests their own portrait with your branding or message to take home.

You can give your guests a print to take home as they leave your event, or you can have it sent to them after the event as a "Thank You" to coordinate with your event follow up communication.

Upload photos to the web wirelessly during the event — directly from the camera as it is taken — or after the event.
